

ISS7 STURGEON, SCIENCE, & SOCIETY - AT THE CROSSROADS: MEETING THE CHALLENGES OF THE 21ST CENTURY

, 2013
ANADA

ISS7 will be held at the beautiful Vancouver Island Convention Centre in the heart of Nanaimo. Trade show – July 22–24, 2013

Building on the success of previous International Symposia on Sturgeon, most recently in Wuhan, China, we expect over 600 delegates from over 35 countries to attend this four day event. We have planned a diverse program which will attract interest of a wide range of delegates including commercial aquaculturists, conservation hatchery operators, government researchers and technicians; scientists and policy makers.

Sturgeon aquaculture (for meat, caviar, skin, bio-active compounds, etc.) is a fast growing sector of the global aquaculture industry. ISS events, which take place only every four years, are the premier sturgeon conference attracting a global audience. Trade show participation, therefore, represents an extraordinary opportunity to showcase your product or service to the world.

Past exhibitors at International Sturgeon Symposia include hatchery equipment suppliers, water quality and monitoring technology companies, fish tagging, tracking and hydro-acoustic manufactures, state and federal agencies, consulting companies and many more.

The Trade Show will be on the same floor as the conference session rooms. Your company will have direct access to the delegates as meals and refreshment breaks will be held in the trade show area. The trade show and exhibition will be open for two and a half days – from noon Monday July 22 to 5 pm Wednesday.
