For the first time since 1999, Australia is proud to be hosting World Aquaculture. World Aquaculture Adelaide 2014 (WAA14) will combine the international annual conference and exposition of the World Aquaculture Society with the highly successful biennial Australasian Aquaculture event.

Many other associations, industry and government will be in attendance as the aquaculture and associated industries convene at the Adelaide Convention Centre for what will be the largest primary industries conference and trade show to be held in the Asia Pacific region for some years. WAA14 will make for an outstanding meeting of aquaculture participants from around the world with up to 3000 attendees expected at this event.

Whatever your company's involvement in aquaculture, you don't want to miss this opportunity.
